PI LIFT STATUS MESSAGES

Windows Programmable Software Provided

The provided Windows based software makes it easy to program and change your display layout whenever necessary.

All units are fully programmable and come with a choice of library images or the option to use your own.

The full PI Display Range comes pre-programmed with lift status messages that can be switched on and off when required.

Custom lift messages can be programmed by simply downloading a graphical image to the screen. The software allows the user to program any image they want and is not just limited to our image library.

- PI Messages can be easily adapted to display different languages if required.

PI CUSTOMISE YOUR DESIGN

The PI Lift Display Range can be customised to suit your desired style prior to leaving the factory.

DEFAULT LAYOUT

* If no requests are made, your PI will be shipped with default settings.

- 3D Light Blue Arrow
- White Position Indicator
- Black Background
- Standard 5 Lift Status Messages

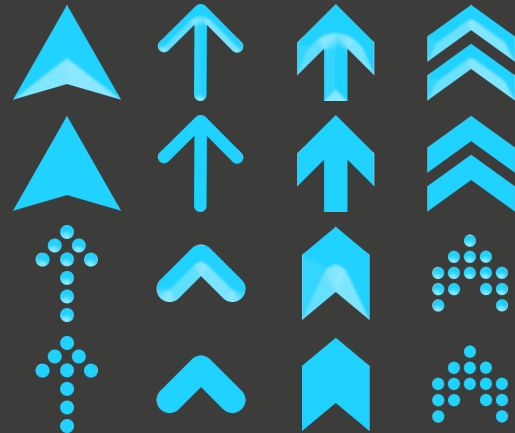

16 BIT COLOUR

Customise the colour of your lift arrow, background, or position indicator OR add a background image.

10 | Customise Your Design

ARROW OPTIONS (3D OR FLAT)

REQUEST YOUR OWN MESSAGES

The PI Range comes with 5 preset status messages (seen on page 9). Customers may request special messages if required.
